uncompromising in every sense
since 1949

Genuine GT spirit

Our elegant new flagship is a real connoisseur's sailing yacht – a sophisticated Grand Tourer that delivers the perfect balance of speed and power, comfort and luxury, easy handling and precise control.

The Elan GT6 is the result of a unique collaboration that blends Elan's hi-tech boatbuilding and fine craftsmanship with the acclaimed naval architecture of Humphreys Yacht Design and the bold, iconic style of Studio F. A. Porsche to create an exclusive yacht with genuine GT spirit. With a GT6 you can sail further and faster, cruise in comfort and arrive in style.

With the GT6 we have distilled the essence of gran turismo into a remarkably fast, luxurious and stylish cruising yacht.

Marko Škrbin, Director, Elan Yachts

Exhilarating performance, complete control

Why choose between speed and comfort when you can have both? The high-performance hull of the GT6 has been carefully optimised with extensive CFD modelling to be fast, stable and easily driven in a wide range of sea states.

Combined with a powerful and perfectly balanced sailplan, it delivers a huge amount of fun for the helmsman and crew on all points of sail. In the true GT spirit, its race-derived features have been optimised for cruising to deliver precise control in all conditions, impeccable handling characteristics and a smooth, comfortable ride.

Our work on the GT6 has been inspired by the work we've been doing on short-handed ocean racing boats. There's a lot of synergy.

Tom Humphreys, *Humphreys Yacht Design*

HUMPHREYS
YACHT DESIGN

First class luxury and comfort on board

Luxury, quality, refinement and comfort are crucial for a Grand Tourer – they're just as important as speed, exhilaration and power. The GT6 delivers a luxurious experience whether you're sailing fast in a strong breeze, motoring quietly along the coast, enjoying a beautiful anchorage or moored in a busy harbour.

With world class product designers from Studio F. A. Porsche working alongside Elan's yacht design experts, the ergonomics of the GT6 bring new levels of comfort to life afloat. Exquisite details and a handcrafted finish enhance the joy of being on board. Under way, the safe, snug forward cockpit is a haven of relaxation. At rest, the stylish saloon and spacious cabins are a comfortable home.

The whole interior of the GT6 bears our unique and recognisable design DNA, combining a minimalistic design approach with the idea of enhanced functionality.

Christian Schwamkrug,
Design Director, Studio F. A. Porsche

Easy handling for short-handed crews

The way we cruise has changed and the GT6 is designed to reflect that. Whether you choose to sail alone, as a couple or family, with guests or other experienced sailors, this yacht has the versatility to suit your style of cruising. There's plenty of raw power at your fingertips, with well-engineered systems to ensure you stay in complete control.

This is a stiff, stable and weatherly yacht that rewards good sail trim but doesn't demand a lot of effort from the crew and tracks perfectly straight even in strong, gusty winds. Humphreys Yacht Design is renowned for creating yachts that balance raw power and speed with control and good handling – and that's what the GT6 is all about.

*Performance is about more than just boatspeed.
It's also about good manners, easy handling
and control.*

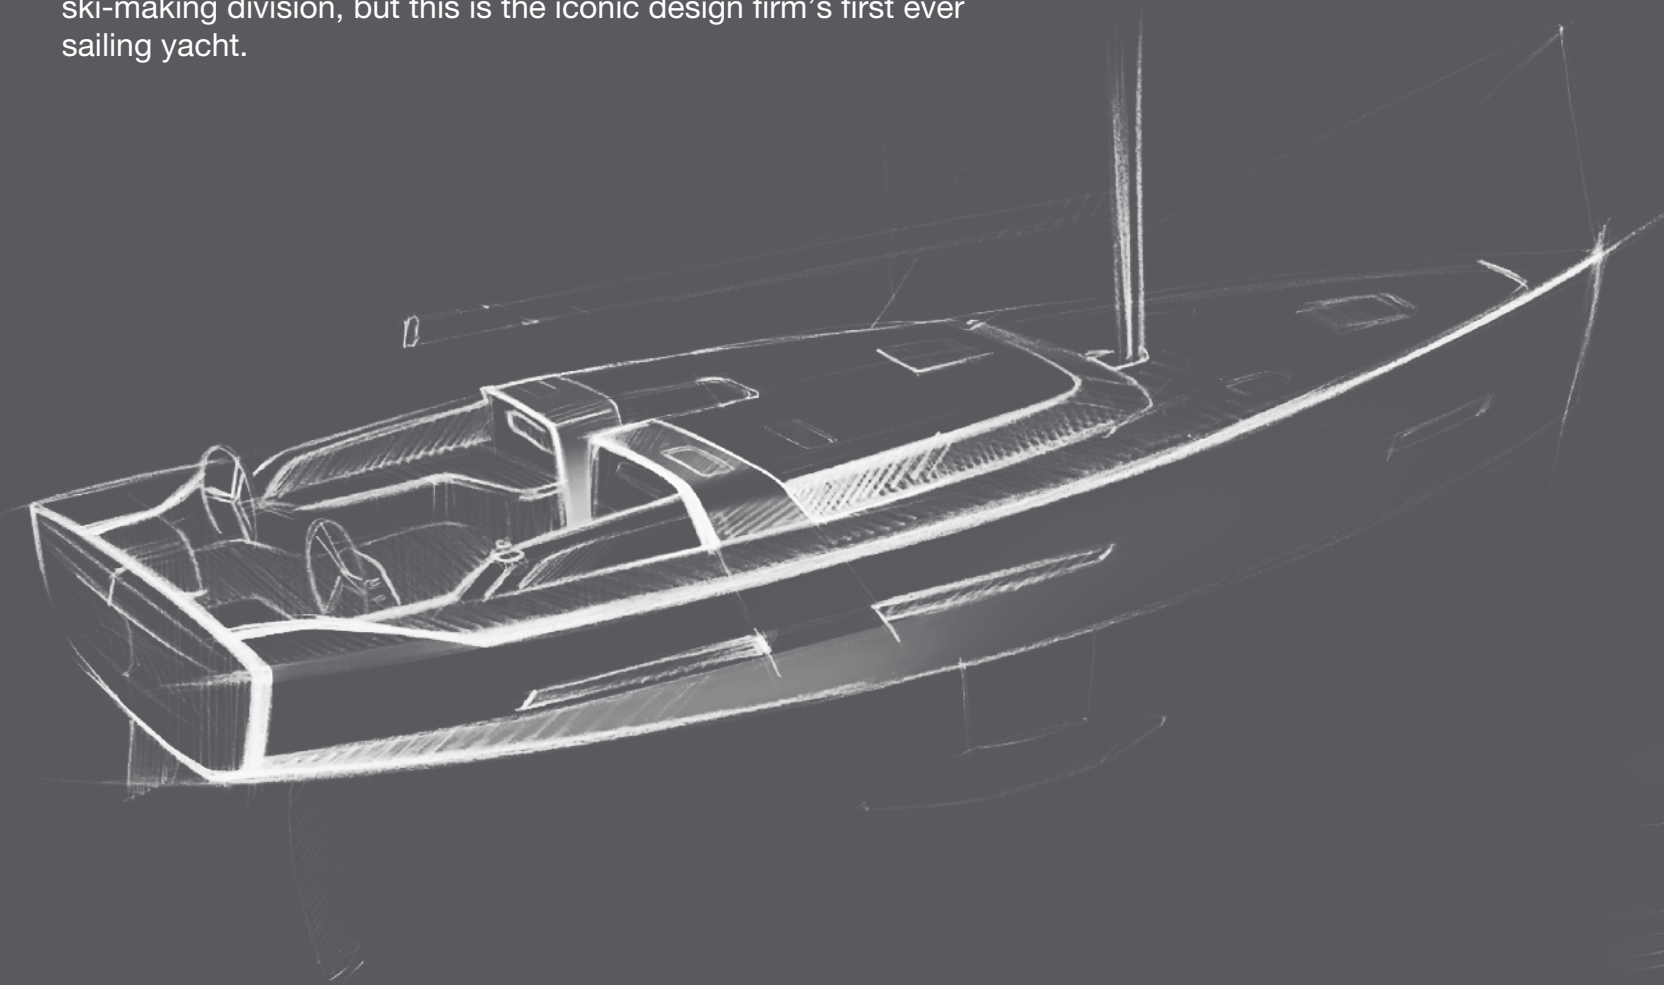

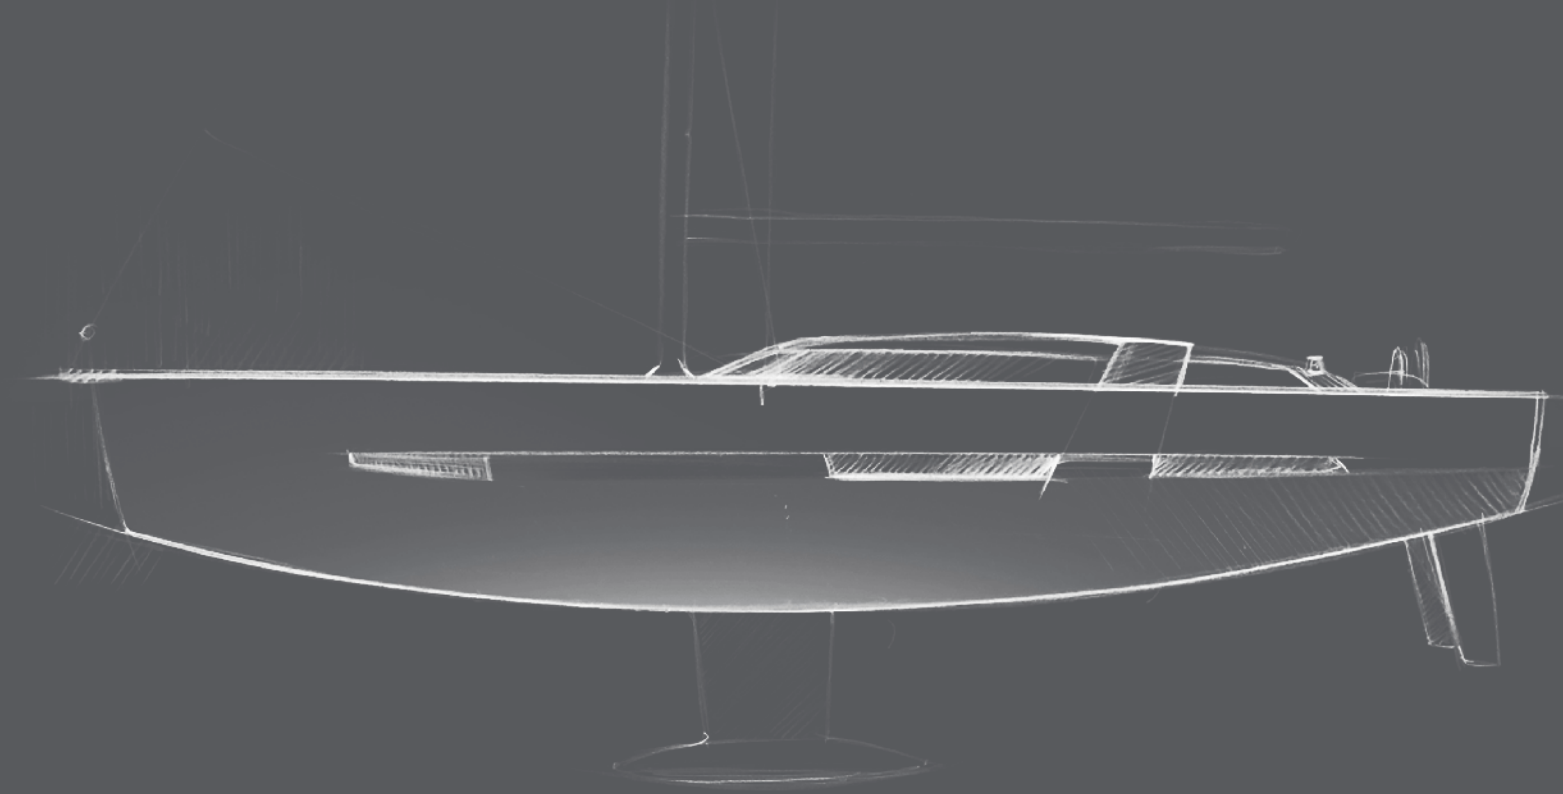

Tom Humphreys, *Humphreys Yacht Design*

Unique contemporary style

The striking silhouette of the GT6, styled by Studio F. A. Porsche, is a well-balanced combination of sharp, distinctive lines and soft, sculpted curves – it's guaranteed to stand out from the crowd of average white boats and will turn heads in any harbour.

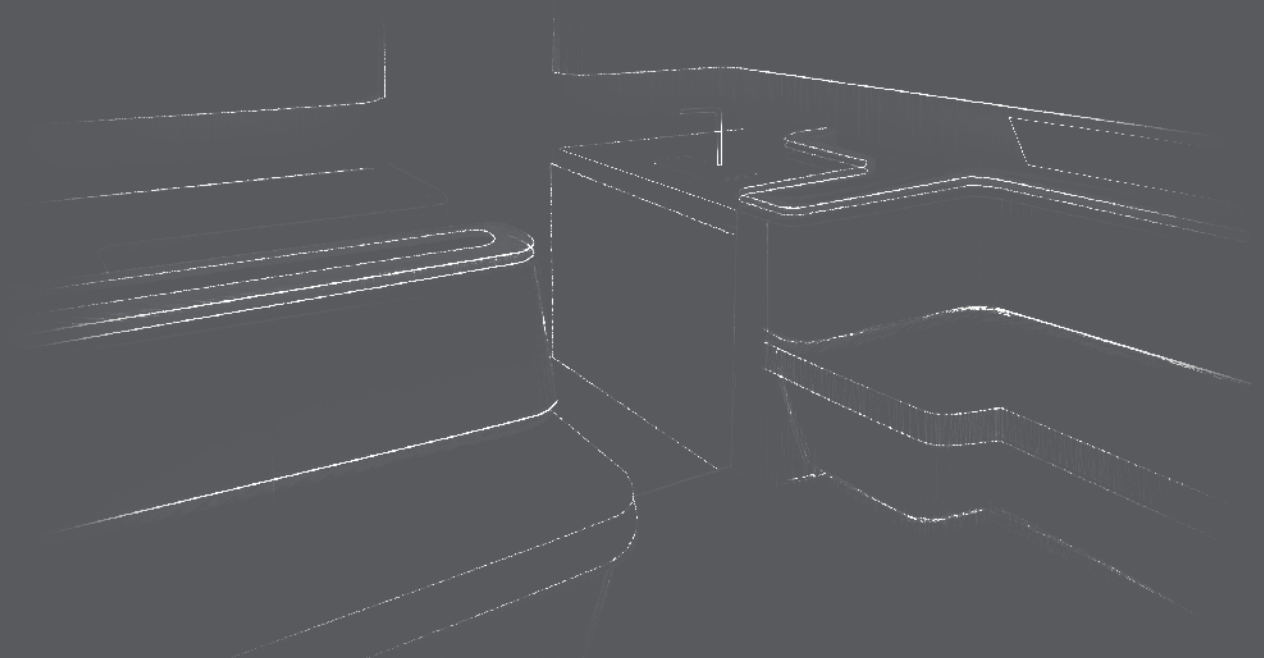

The exterior design combines minimalism with dynamics, bringing sailors closer to nature. Some elements of the stunning cockpit design are inspired by the aerodynamics of iconic sports cars while others such as the steering pedestals and 'floating' stern take their design cues from nature, inspired by seagull wings and stingray fins. Studio F. A. Porsche is a longstanding partner of Elan's ski-making division, but this is the iconic design firm's first ever sailing yacht.

The elaborately curved surfaces allow for beautiful flares of light as well as the reflections of sky and sea.

Christian Schwamkrug,
Design Director, Studio F. A. Porsche

STUDIO F·A·PORSCHE

Strong, seaworthy and built to last

Elan's market-leading 3D VAIL infusion technology and composite bulkheads fully laminated in place create a stronger, stiffer, lighter hull, using premium vinylester resin systems that enable more precise, higher-quality manufacturing.

With more than 60 years at the forefront of composite engineering, producing skis as well as yachts and constantly refining our technology to stay ahead of the curve, few other shipyards can rival Elan's experience and know-how. Another key strength is the fine craftsmanship of our shipwrights and carpenters, who produce a quality of finish that most production builders struggle to match.

Our unique combination of cutting-edge composite technology and traditional craftsmanship produces yachts that last a lifetime and hold their value.

Marko Škrbin, Director, Elan Yachts

STANDARD

COCKPIT AND DECK

- Carbon Fibre Steering Pedestals
- Full Artificial Teak Deck
- Aft Artificial Teak covered storage Boxes and Sats
- LifeRaft Storage
- Sem-Deflated Dinghy Storage
- Small Bathing Platform
